

NIRONE KITS FOR SCIENCE

NIRONE® RESEARCH KIT

A complete package for research purposes at universities
or industrial R&D labs

NIRONE Research Kit

The NIRONE Research Kit is a complete package for research purposes at universities or industrial R&D labs. The NIRONE Research Kit can also be used in extending the NIR spectroscopy education beyond the NIRONE Edukit and use it also as a laboratory and research project tool in education.

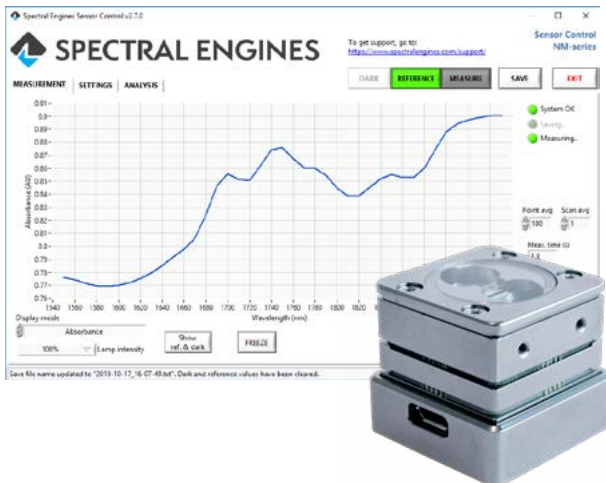

NIRONE Research Kit includes specific Evaluation Kits for 2nd overtone (S1.7), 1st overtone (S2.0) and combination (S2.5) spectroscopy ranges. Research Kit also includes all required front optics (Micro reflection optics, SMA-connector, TubeOptics with bigger spot size in heterogeneous samples) for a different kind of material analysis. All optics can be easily changed for different measurement purposes.

NIRONE Sensors included in the kit can be connected through USB to PC and Sensor Control Software makes it easy to start studying different materials. The NIRONE Research Kit provides an excellent starting point for technology evaluation and application studies.

Key Benefits

- A complete package for research purposes
- Practical
- Affordable
- Includes all required optics for different kind of material analysis

Empower your spectroscopy research or education project with NIRONE Research Kit.

NIRONE Research Kit Includes NIRONE Sensor S Evaluation Kits:

- S1.7-EVK
- S2.0-EVK
- S2.5-EVK

Accessories included:

- TubeOptics
- Large white reference target
- SensorControl software

Our Sensor Control software makes it easy to start studying different materials.
